Would you like to create the future for middle school STEM education in Michigan?

If so, you should be a part of Mi-STAR!

What is Mi-STAR?

Mi-STAR, the Michigan Science Teaching and Assessment Reform project, is developing a new Michigan-based, fully integrated, middle school science curriculum. The curriculum will emphasize connections between science, technology, engineering and mathematics and will engage students in the practices of science and engineering.

Mi-STAR is a partnership of public higher education and K-12 schools in Michigan funded by the Herbert H. and Grace A. Dow Foundation.

What are the benefits?

Mi-STAR is looking for advanced graduate students from the STEM fields or from education research programs who are interested in developing the new, Michigan-based, middle school integrated science curriculum.

There are two levels of graduate student participation:

- Curriculum Development Scholars work with teachers over the summer to create curricular materials (2 week minimum commitment at \$160/day)
- Curriculum Review Scholars review the curriculum units that are developed providing feedback on technical accuracy and pedagogy as well as recommendations for improvement (8-16 hour commitment at \$20/hour)

How can I find out more?

Visit the Mi-STAR website at <http://mi-star.mtu.edu/> - it is continually updated.

I want to be a part of Mi-STAR! – *What should I do?*

- Fill out and submit the form on the next page!

I am interested in learning more about Mi-STAR and would like to receive more information.

(Note: This form is online at <http://mi-star.mtu.edu/contact-us/>) To save the form for attaching to an email, select *File* then *Print* then select *Adobe PDF* as the printer.
